Continuation of Box II.1

Although claims 54-72 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compounds

Continuation of Box II.2

Claims Nos.:

The high number of provisos in independent claim is objectionable under Article 6 PCT according to which the claims should define the matter for which protection is sought and should be clear and concise. The instrument of a disclaimer may only be used in an exceptional case. Owing to the exceptional nature of a disclaimer a high number of disclaimers cannot be accepted.

The present application contains many independent claims. There is no clear distinction between the independent claims because of overlapping scope. There are so many claims, and they are drafted in such a way that the claims as a whole are not in compliance with the provisions of clarity and conciseness of Article 6 PCT, as it is particularly burdensome for a skilled person to establish the subject-matter for which protection is sought. The non-compliance with the substantive provisions is to such an extent, that the search was performed taking into consideration the non-compliance in determining the extent of the search (PCT Guidelines 9.19 and 9.25).

The search was based on the examples and on the subject-matter according to claim 1 for R52 = H.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.

International application No. PCT/US2006/020607

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. X Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
Although claims 54-72 are directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compounds
Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically: See FURTHER INFORMATION sheet PCT/ISA/210
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
see additional sheet
As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: See annex
Remark on Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1, partially:16, 18-42, 47-72

compounds of formula VIII according to claim 1, pharmaceutical compositions comprising such compound of formula VIII, methods including a therapy using such compound of formula VIII

1.1. claims: 43, partially: 47-72

compounds according to claim 43, pharmaceutical compositions comprising these compounds and methods including a therapy using these compounds

1.2. claims: 44, partially 47-72

compounds according to claim 44, pharmaceutical compositions comprising these compounds and methods including a therapy using these compounds

1.3. claims: 45, partially: 47-72

compounds according to claim 45, pharmaceutical compositions comprising these compounds and methods including a therapy using these compounds

1.4. claims: 46, partially: 47-72

compounds according to claim 46, pharmaceutical compositions comprising these compounds and methods including a therapy using these compounds

2. claims: 2, partially: 17, 20-42,47-72

compounds of formula VIII according to claim 2, pharmaceutical compositions comprising such compound of formula VIII, methods including a therapy using such compound of formula VIII

3. claims: 3, partially: 17-29, 34-42, 47-72

compounds of formula VIII according to claim 3, pharmaceutical compositions comprising such compound of formula VIII, methods including a therapy using such compound of formula VIII

4. claims: 4, partially:17-25, 28-42, 47-72

compounds of formula VIII according to claim 4, pharmaceutical compositions comprising such compound of formula VIII, methods including a therapy using such compound of formula VIII

5. claims: 5, partially:8-10, 16, 20-25, 30-42, 47-72

compounds of formula II according to claim 5, pharmaceutical compositions comprising such compound of formula II, methods including a therapy using such compound of formula II

6. claims: 6, partially:8-10, 17, 20-25, 30-42,47-72

compounds of formula II according to claim 6, pharmaceutical compositions comprising such compound of formula II, methods including a therapy using such compound of formula II

7. claims: 7, partially: 8-10, 17, 20-25, 34-42,47-72

compounds of formula II according to claim 7, pharmaceutical compositions comprising such compound of formula II, methods including a therapy using such compound of formula II

8. claims: 11, partially:15,16, 18-25, 30-42, 47-72

compounds of formula III according to claim 11, pharmaceutical compositions comprising such compound of formula II, methods including a therapy using such compound of formula III

9. claims: 12, partially:15, 17, 20-25, 30-42,47-72

compounds of formula III according to claim 12, pharmaceutical compositions comprising such compound of formula III, methods including a therapy using such compound of formula III

10. claims: 13, partially:15, 17-25, 30-42, 47-72

compounds of formula III according to claim 13, pharmaceutical compositions comprising such compound of formula III, methods including a therapy using such compound of formula III

11. claims: 14, partially:15, 17-25, 34-42, 47-72

compounds of formula III according to claim 14, pharmaceutical compositions comprising such compound of formula III, methods including a therapy using such compound of formula III

12. claim: 73

compounds of formula X

13. claim: 74

Method of improving liver/heart selectivity of a thyromimetic compound of formula Y

14. claim: 75

Method of increasing the therapeutic index of a thyromimetic compound of formula Υ

15. claim: 76

Method of designing a thyromimetic compound having improved liver/heart selectivity.

16. claim: 77

Method of designing a thyromimetic compound having improved the rapeutic index $% \left(1\right) =\left(1\right) \left(1\right) +\left(1\right) \left(1\right) \left(1\right) +\left(1\right) \left(1\right)$
